KARTIK NITTURKAR

Business Intelligence Analyst | Data Warehousing & Dimensional Modeling | Advanced SQL | Python | Dashboards & Metrics

Bengaluru, India | +91 8088965776 | kartiknitturkar777@gmail.com | LinkedIn: Kartik Nitturkar | GitHub: kartik496

PROFESSIONAL SUMMARY

Business Intelligence Analyst with 2+ years at Amazon delivering enterprise-grade BI solutions - dimensional data modeling, data warehouse design, advanced SQL, and Python-powered analytics. Deep expertise in star/snowflake schema, fact and dimension tables, SCD handling, and ETL pipeline development, paired with a strong command of Tableau, Power BI, and end-to-end dashboard delivery. Skilled at translating complex business requirements into scalable warehouse architectures and self-service BI products. Gold-Badge SQL performer (HackerRank 819) and published author on Python/SQL in data science workflows.

TECHNICAL SKILLS

Advanced SQL & Databases: MySQL, PostgreSQL, SQL Server - CTEs, window functions, multi-table joins, subqueries, stored procedures, indexing & query optimization, large-scale data extraction, aggregation pipelines

Data Warehousing & Modeling: Star/snowflake schema, fact & dimension tables, SCD Type-1/2, surrogate keys, OLAP/OLTP design, conformed dimensions, staging/integration/presentation layers

Python: Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, XGBoost - data wrangling, ETL scripting, feature engineering, statistical analysis (hypothesis testing, regression, A/B testing)

BI & Visualization: Tableau (LOD expressions, calculated fields, drill-downs, KPI scorecards), Power BI (DAX measures, time-intelligence, star-schema models, Power Query/M, RLS, paginated reports), Looker Studio, QlikView

ETL & Data Engineering: End-to-end ETL design (batch & incremental), staging layer management, pipeline optimization, data quality (null handling, deduplication, referential integrity), data lineage documentation, AWS

WORK EXPERIENCE

ML Data Associate II - Business Intelligence & Data Warehousing - Amazon Oct 2024 - Present | Bengaluru, India

- Designed enterprise dimensional data models (star/snowflake schema, fact & dimension tables, SCD Type-2, surrogate key management); partnered with data engineering to align DW architecture with enterprise-wide analytical and reporting needs.
- Authored and optimized advanced SQL - CTEs, window functions, multi-table joins, stored procedures, subqueries, indexing - to extract, transform, and load large-scale datasets; reduced query run-time by 35% via index redesign and query rewrites.
- Developed Python (Pandas, NumPy) ETL pipelines for batch and incremental loads - null handling, deduplication, referential integrity - reducing data-prep cycle by 40%; built validation frameworks maintaining 98%+ accuracy across all BI platforms.
- Built and maintained enterprise Tableau and Power BI dashboards - DAX time-intelligence, KPI cards, drill-throughs, RLS - delivering self-service analytics to 10+ stakeholder groups; automated 8+ recurring reports saving ~120 analyst-hours/month.
- Produced comprehensive DW documentation (architecture diagrams, ETL mapping specs, data dictionaries); mentored 2-3 analysts on SQL, Python, and dimensional modeling best practices; maintained 98%+ quality scores across all deliverables.

PROJECTS

Enterprise Data Warehouse & ETL Pipeline - E-Commerce Analytics

Python - Advanced SQL - Star Schema - Dimensional Modeling - SCD Type-2 - ETL - Tableau - Power BI

- Designed end-to-end DW architecture (star schema: 4 fact tables, 12 dimension tables, SCD Type-2, surrogate keys) on 5,500+ records; built Python & SQL ETL across staging-integration-presentation layers - 30% quality improvement; delivered Tableau KPI dashboards and Power BI reports with full DW documentation.

Predictive Analytics Data Mart - Customer Lifecycle & Marketing Intelligence

Python (Pandas, NumPy, XGBoost) - SQL - Snowflake Schema - ETL - Feature Engineering - Power BI - DAX

- Owned full lifecycle for a customer analytics data mart - snowflake schema, Python ETL on 10,000+ records, 20+ engineered features, XGBoost scoring (AUC-ROC=0.91); built Power BI dashboard (12+ DAX measures: churn rate, CLTV, campaign ROI) enabling near-real-time marketing action.

Multi-Source BI Analytics - Digital Market Intelligence

Python (Pandas, NumPy, SciPy) - SQL - ETL - Tableau (LOD) - Power BI - DAX - Statistical Analysis

- Built a Python ETL pipeline on 10,000+ records and engineered 8 derived features loaded to a 3NF relational model; applied Pearson/Spearman correlation and regression to identify 3 high-growth categories (87%+ confidence) informing go-to-market strategy; delivered Tableau LOD dashboards and Power BI reports with automated refresh, cutting the reporting cycle by 50%.

EDUCATION, CERTIFICATIONS & AWARDS

PES University, Bengaluru - BTech, Mechanical Engineering | CGPA: 6.49 | Aug 2023
HackerRank Gold Badge: SQL (Score 819) & Python (Score 535) | SQL Cert (Jun 2023), Python Cert (Jul 2023)
Full Stack Data Science - AlmaBetter, Nov 2023 (Data Warehousing, ETL, Dimensional Modeling, Advanced SQL, Python, Power BI, Tableau)
Publication: "The Importance of Python and SQL in Data Science" - Online, Mar 2023
